

PAINUC publications

1. E. M. Andreev, N. S. Angelov et al.,
Streamer chamber spectrometer with CCD videocameras for
studying pion interactions with light nuclei at
energies below the Δ -resonance,
Nucl. Instr. and Meth. **A489** (2002) 99.
2. N. Angelov, F. Balestra et al., $\pi^{\pm 4}\text{He}$ -interactions at 218 MeV/c.
Nuovo Cimento **121B** (2006) 771
3. N. Angelov, F. Balestra et al., On the muon neutrino mass,
Nuclear Physics **A 780** 780 (2006) 78.
4. Yu. A. Batusov, ..., M. G. Schepkin et al.,
Resonant behaviour in double charge exchange reaction
of π^+ -mesons on the nuclear photoemulsion,
Eur. Phys. J. **A 28** (2006) 11-17.
5. N. Angelov, F. Balestra et al.,
Two-prong $\pi^{-4}\text{He}$ interactions at 106 MeV,
Eur. Phys. J. **A 34** (2007) 255.
6. F. Balestra, P. Batiuk et al.,
Estimation of the mass of the lighter particle emitted
in a two body decay reaction,
Nucl. Instr. and Meth. **A604** (2009) 694.
7. The PAINUC Collaboration,
Features of π induced collective resonances in nuclei.
Eur. Phys. J. **A 47** (2011) 3.
8. Yearly reports to Congress of Italian Physical Society till 2014.
