

COMPACT STARS IN THE QCD PHASE DIAGRAM VI

(Cosmic matter in heavy-ion collision laboratories?)

26-29 September 2017, Dubna

Main topics:

- QCD phase diagram for HIC vs. astrophysics
- Quark deconfinement in HIC vs. supernovae, neutron stars and their mergers
- Strangeness in HIC and in compact stars
- Equation of state and QCD phase transitions

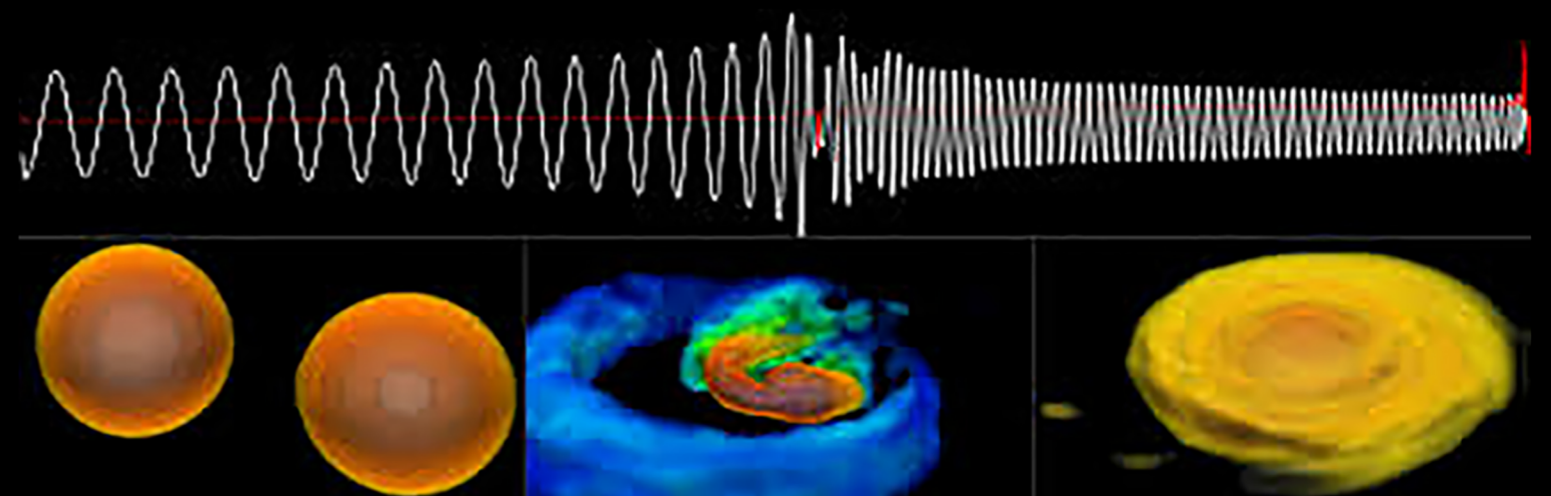

International Steering Committee:

Rachid Ouyed (Chair) (Canada),
Prashanth Jaikumar (USA / India),
Ignazio Bombaci (Italy),
Rodrigo Negreiros (Brazil),
David Blaschke (JINR / Poland),
Jochen Wambach (Germany),
Efrain Ferrer (USA),
Fridolin Weber (USA),
Renxin Xu (China),
Vivian Incera (USA),
Kohsuke Sumiyoshi (Japan),
Massimo Mannarelli (Italy),
Tobias Fischer (Poland),
Matthias Hempel (Switzerland)

Local organizers:

David Blaschke (JINR & UWr & MEPhI) - co-chairman
Hovik Grigorian (YSU & JINR) - co-chairman
Alexander Ayriyan (JINR)
Alexandra Friesen (JINR)
Anna Kotova (JINR)
