# Update problems

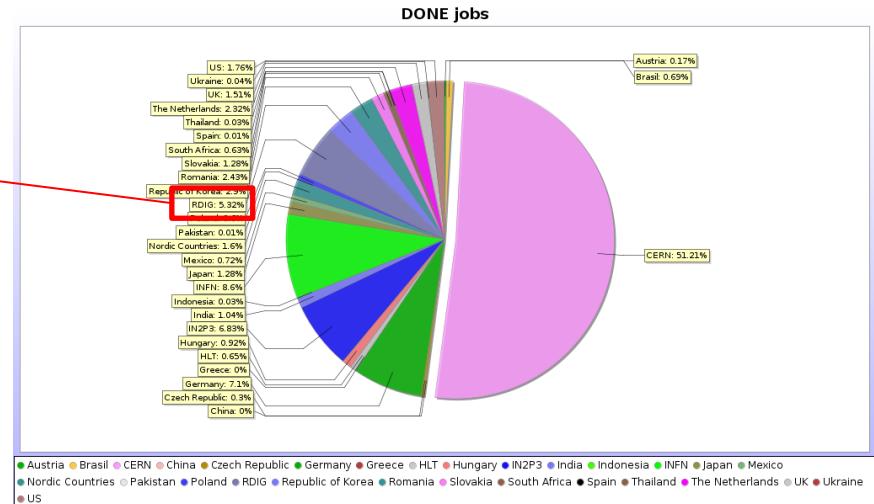

- Save data from old small sites (Troitsk, ITEP)
- Installation of new sites (e.g. SARFTI) or update of some old sites (e.g. MEPHI) need proper virtualization or many administrators on all sites.

One of reasons for virtualization: Cream-CE on Rhel6 only now.

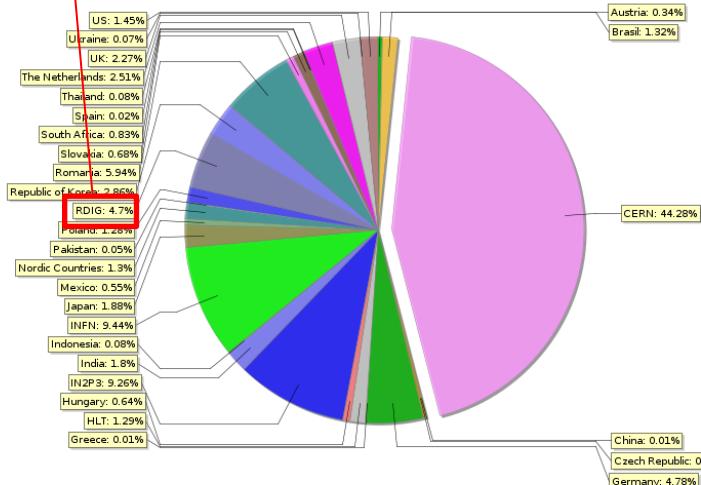

# RDIG production in the last year (till September)

RDIG 5.32% vs 6,72% on 2017

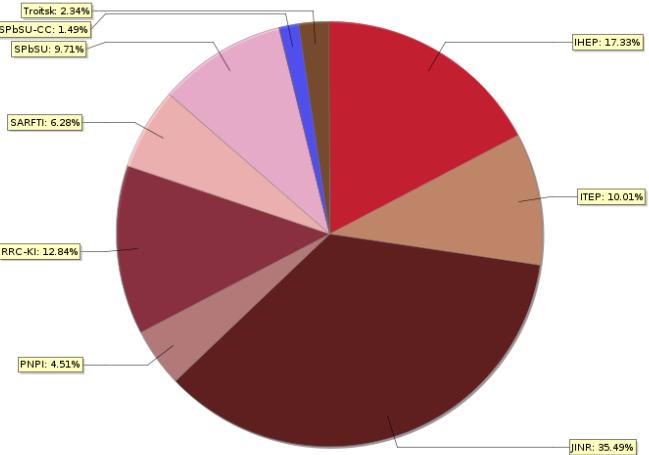

RDIG 4,7% vs 5,89% on 2017

# Summary

- Appearance of a new site - SARFTI
- Plans for 2018:
  - connect 8 of 9 sites to the LHCONE.
  - 4 sites will support IPv6.
- We look forward to:
  - starting all SARFI resources and counting these in REBUS.
  - coming back to the production in MEPHI (in next month).

Thank you for your attention!
