Creating cloud storage system at JINR

Thursday, 1 October 2015 15:35 (15 minutes)

This article describe the questions of construction the distributed storage system and options for using it. As a means of creating such storage systems were studied Ceph (FS), GlusterFS, MooseFS, LizardFS. As a result of the analysis system was chosen which is currently used as a storage at JINR cloud service. It also provides options to access cloud storage and how to implement them.
