Transition to standard 3+ and optimization of the universities network in Russia

Friday, 2 October 2015 14:20 (20 minutes)

This report provides an insight into the transition of the Russian higher education to standard 3+, peculiarities of the bachelor programs according to standard 3 and the formation of educational programs of the new standard.

Special attention is paid to the optimization of the network of high schools on the basis of consolidation, building a network of Russian universities able to be on the list of the worldwide ranking universities.

The features, advantages and disadvantages of a sharp consolidation of universities, reduction of the number of branches and private universities as well as the role of public and European accreditation for the legal recognition of Russian diplomas are considered too.
