ESIS KRION-6T beam emittance measurement device

Tuesday, 29 September 2015 16:55 (15 minutes)

The work is devoted to study and development of the ESIS KRION-6T beam emittance measurement device using sectional ion collector method. In the course of the work, the charge measurement possibility using multichannel ADC with current input was researched. MCU-based data acquisition system was designed. The system tests was carried out.

Primary author: Mr PONKIN, Dmitriy (LHEP JINR)

Co-authors: Mr DONETS, Denis (LHEP JINR); Dr GORBUNOV, Nikolay (JINR)

Presenter: Mr PONKIN, Dmitriy (LHEP JINR)

Session Classification: Triggering, Data Acquisition, Control Systems
