UTFSM/CCTVal Data Center: 10 years of experience

Friday, 8 July 2016 09:40 (20 minutes)

Starting end of 2006 UTFSM Data Center provides its computational resources for users from UTFSM and other Chilean universities. Since 2009 cluster facilities are also available in the frame of Grid Computing. The range of problems being solved at the cluster is huge: from fundamental and applied problems in different branches of Physics, Chemistry, Astronomy, Computer Science, etc. to the educational and training purposes. History and current cluster status (including configuration and operational modes) are presented.

Primary author: IVANOV, Yury (UTFSM, Valparaiso, Chile)

Co-author: Prof. SALINAS, Luis (UTFSM, Valparaiso, Chile)

Presenter: IVANOV, Yury (UTFSM, Valparaiso, Chile)

Session Classification: Plenary reports

Track Classification: 10. Databases, Distributed Storage systems, Big data Analytics
